late June edition

Dear Friend,

Less than one week remains before the 18th Annual WoodenBoat Show begins! We hope you have your tickets and travel plans all set. Remember, if you want to attend the special tribute and dinner to the Atkin family, the Last Day to Buy Tickets is Monday, June 22nd at high noon (EST). No tickets will be sold at the Show (although that's where pre-purchased tickets can be picked up).

### Row a Traditional Peapod!

[Downeast Peapods](#) Offers a Classic Rowing Experience

Originally built by Jimmy Steele, these exceptionally sea-worthy, double-ended rowing boats are still built in Jimmy's shop in Brooklin, Maine, by master shipwright Peter Chase, using the same demanding standards, techniques, jigs and tools. Whether used as a tender or for the sheer pleasure of rowing a boat that moves and responds beautifully, these works of art are as functional as they are beautiful.

Stop by the Downeast Peapod booth to see the boat, meet the builder and take one out for a row.

### Freedom Schooner [AMISTAD](#) Shares its Story

As many know, the Freedom Schooner [Amistad](#) was built at [Mystic Seaport](#) in 2000. Now you have another chance to see how she's weathered the past nine years, which included two transatlantic voyages. One of only two wooden schooners to visit Africa in the past 25 years, her construction consists of nearly all traditional materials. See a video of her building process and meet the crew who keep her running smoothly.

### [Axis Air](#) Helps you Breathe Easier!

While we all love a mirror-like finish of varnish or paint, protecting our lungs from these coatings during application is a top priority. Our new exhibitor, [Axis Air](#), will show a range of products to meet these needs at the Show.

"Air to Breathe - Air to Paint". Axis Air manufactures fresh air respirators and HVLP Turbine sprayers. They offer the world's only combined sprayer & respirator system. Visit their booth and learn about how to protect your precious lungs from dust, fumes and irritants.

Only four more days to wait until you can share your enthusiasm for wooden boats with other like-minded folks! We can't wait...

Sincerely,

Your friends at  
The WoodenBoat Show
